# DELETE THIS Context, History • Progress

### Falsity, Error

- Contrived "Reality"
- Subjective
- Multiple
- Relative
- Ever-changing

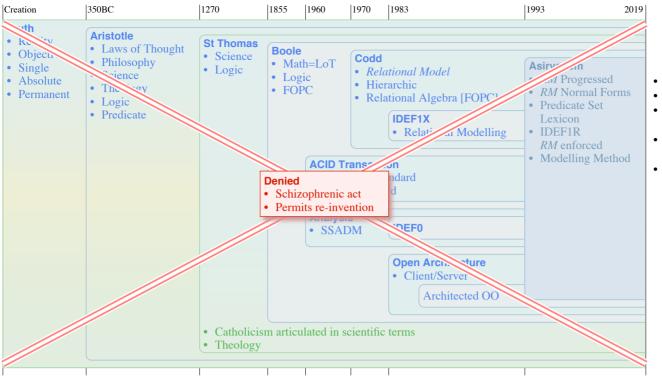

The Fall

2019

#### Note

- This is not a Venn diagram, it is an Hierarchic Set diagram:
  - each set is defined by its name and properties
  - a nested set is not a subset of the parent set, it is an existential dependency. Usually a progression, something quite different from the parent set
  - square corners means Independent; round means Dependent
  - · a set that overlaps two parent sets means that it is dependent on the two parents
  - · concerning overlapped sets, the small spaces of sets underneath are not relevant, they are not connected to the overlapping set
  - Additionally, it is laid out as a chronology, left to right, and therefore open at the right
- This page is not to scale, there are two timelines

# DELETE THIS Context, History • Degeneracy

- Logically complete
- Expressively complete
- Nothing intractable
- (impossible)
- Completely integrated *All truth is integrated*
- Relational Power; Speed; Integrity
