MyServer Memory Usage

As at 21 Apr 12 15:15

	ParmValue	SpaceMB	Diff
executable codesize + overhead	147,689	144	
total data cache size	16,235,746	15,855	
procedure cache size	2,048,000	4,000	
statement cache size	50,000	98	
number of sort buffers	500		
additional network memory	75,202,560	72	
default network packet size	2,048	12	
max network packet size	4,096		
disk i/o structures	1,024	0	
heap memory per user	12,288	23	
lock hashtable size	2,048	0	
number of large i/o buffers	50	25	
number of locks	5,000,000	762	
number of open objects	120,000	186	
number of open indexes	200,000	506	
number of open partitions	100,000	96	
stack size	184,320	362	
stack guard size	4,096	8	
user log cache size	4,096	8	
session tempdb log cache size	4,096	8	
size of global fixed heap	8,000	16	
size of process object map	4,000	8	
et cetera			
number of user connections	2,000		
number of worker processes	0		
Working Total		22,189	1,223
total logical memory	11,986,652	23,411	8,589
total physical memory	16,384,000	32,000	
max memory	16,384,000	32,000	

- *Blue column: ParmValue is multiplied by blue rows*
- *Indented rows: values are excluded from the totals*
- *Purple text: read-only reports from Sybase*
- *Red text: substantial error begging correction*
