

The image shows a standard Windows-style dialog box titled "ISQL Error". The title bar is blue with a close button (an 'X' in a red square) on the right. The main area has a light beige background. The text inside the dialog provides details about a database error: "Could not execute statement.", "Check constraint violation occurred, dbname = 'staging', table name = 'Solution', constraint name = 'Solution\_Solver\_Max\_4\_ck'.", "Sybase error code=548, SQLState='23000'", and "Severity Level=16, State=1, Transaction State=0". Below this text, it says "Line 1" and shows a text area containing the SQL statement: "INSERT Solution VALUES (91, 21) -- PIT [2] Suspended, waiting for 19". At the bottom center, there is an "OK" button.

## ISQL Error

Could not execute statement.

Check constraint violation occurred, dbname = 'staging', table name =  
'Solution', constraint name = 'Solution\_Solver\_Max\_4\_ck'.

Sybase error code=548, SQLState="23000"

Severity Level=16, State=1, Transaction State=0

Line 1

```
INSERT Solution VALUES (91, 21) -- PIT [2] Suspended, waiting for 19
```

OK
