Sean

You are on record for ongoing uncivilised; vulgar; and aggressive behaviour. Desperately seeking attention and validation. Your admitted schizophrenia is such that you are unaware that you are violating the "code of conduct" that you prepared.

Last month at the Blues Point Hotel, during your aggression, you challenged me to take it up with the publican, also recorded. I did not give you the drama that the insane crave, and I chose not to bring the name of Mensa into yet another media event.

Enough. Do not speak to me, do not harass me, do not approach me. I appreciate that you are obsessed with me, begging for validation, and if that is not forthcoming, you switch to aggression. Just stop. Find something else to obsess about.

If you need to communicate anything to me in your hysterical exercise of duties as State Sec, do so in writing, by email only.

Regards

Derek Ignatius Asirvadem
